

How to Make a Fish

1. Choose 2 coloured strips of paper.
2. Fold the strips of paper in half and gently pinch.
3. Place the strips on the cross, making sure strip 1 is placed first on the vertical and strip 2 is horizontal.
4. Fold each numbered line to its corresponding window e.g. 1 to 1.
5. Make sure the first fold is loose as this is the locking step of the weave.
6. Line 4 goes through the loop created by line 1.
7. Gently tighten.
8. Turn over and realign the strips to the cross.
9. Repeat folding each line to its corresponding window.
10. Lock line 4 through the loop created by line 1.
11. Turn over.
12. Take the two longest strips and fold back and interlock under.
13. Cut the fins.
14. You've made a fish!
